

## LIST OF MARCH AUGUSTAS Compiled by PAUL MAYO

This is a working draft and I have a lot more information on most of these cars

4<sup>th</sup> December 1996, Revised 2 December 2014; Photos added, 3 files consolidated 3 June 2015, revised 10 Jan 2016 (John Millham's data added)(Version 1); Photos added (Version 2)

The numbers of March Augustas that were made for Kevill, Davies and March and who made them has long been a matter of discussion.

I think the number was close to 12. I reckon on 10 definites now, for 6 of which I have chassis numbers. The Duke of Richmond & Gordon corresponded with me in 1977 saying he couldn't remember how many they made but thought it was about 12.

Published production data indicates that Augusta chassis 234 (production numbers) were produced as follows:  
1934: 1 to 1169; 1935: 1170 to 2482; 1936: 2483 to 3110.

Chassis numbers were from 1001 to 4110 and there are no (apparent) anomalies.

Chassis (approx) 34-2169 would be the last of 1934, and the highest we have is 34-1902.

So the 6 chassis of which we have details were manufactured in 1934. Apparently chassis production was begun early in 1934.

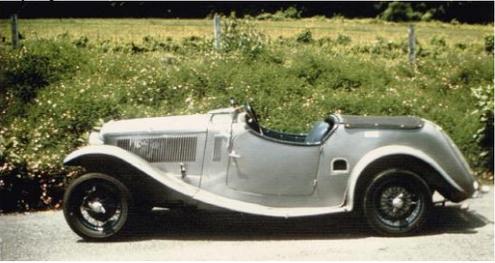

As we know that the March Augusta was announced in June 1934 and 'available in a few week's time' and the earliest registration we have is 6th July, it looks as if several may have been made by early July. It could be that all the cars were made in 1934.

		London County Council		<p><b>1983-2015:</b> Mike Wheeler, UK, bought it from Malcolm Elder.</p> <p>This chassis number seems oddly late for the BGO483 registration date but 1267 was a 1934 car .A previous owner wrote to me that the log-book shows March had it from 06.07.34 to 15.03.35, and then there is a gap to 1937! But the Duke wrote to me that he had run the car for "a couple of pleasant years" and it seems established that he went to the Monaco GP in it in 1935 with the Arnott Centric Blower fitted. The 1935 Monaco GP was on the 22nd April 1935. By July it had done 12,000 miles. I suppose it is possible that BGO 483 was originally on chassis 34-1078 and that on return from Monaco, with a lot of miles on the clock the registration was transferred to chassis 34-1267. Perhaps 34-1078 subsequently became DPL 938? Two years on from the Monaco trip would be early summer 1936 and could coincide with a transfer to 1267 at this time with 1078 becoming DPL 938 for 18.5.36? This is mightily hypothetical and there is probably a simpler explanation!</p> <p>Photo by Paul Mayo 31 July 2011:</p>

		635/655?  Issued by London County Council from 1935		Could this be the Brightwell 2014 auction car 34-XX06 below?
34-XX02		BYP 9  Issued by London County Council from 1935		John Clarke, IOW 1947-54, scrapped 1960's, Black
34-XX03		BXH 905  Issued by London County Council from 1935		<b>1950s:</b> Photos from NMM, Beaulieu. Light colour. 1950's Could be Green second March said to be owned by the St. John Clarkes, IOW. Might be Green March for sale in London (Autosport 30/03/56), The car driven by Captain Frost in the 1934 Alpine Trial was also Green - this was described in a letter from Lord March to me in 1977. But all this is conjecture. The green car(s) can't be same as SB 5046 which stayed in Scotland. The Capt. Frost car would be in the earliest batch in summer 1934
34-XX04		DYW 77  Issued by London County Council from 1937		<b>1961-1963:</b> March referred to in LMC NewsSheet Jan 1980 owned by a Dr Keith Eaton of Bracknell. A letter to him failed to produce an answer.
